DETAILED ACTION

The finality is hereby withdrawn in light of newly found art. The new non-final action is below.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 6 Are rejected under 35 U.S.C. 102(b) as being anticipated by Pettersson et. al. (6276428). Pettersson et. al. discloses a movable building door, made up of panels 12, each panel with two opposite longitudinal edges 14, 16, that extend parallel to one another and substantially normal to a direction of movement of the respective panel and two transverse edges 22, that extend between the longitudinal edges and are aligned parallel to the direction of movement of the respective panel, each panel having interior and exterior walls, the panels being guided along a guide rail 44, 46, that has a curvilinear section, as best seen in Figure 1, in such a way that these panels remain at least approximately parallel to the guide rail, the panels articulated to one another about axes of pivoting 32, 34, parallel to their longitudinal edges by virtue of pivot elements 40, that consist in shapings at the ends of the transverse edges allowing for the panels to be articulated, the panels equipped at their longitudinal edges with male and female anti-trapping profiles, that form a single piece and allow the panels to be articulated, as best seen in Figures 6 and 10, characterized in that the

Application/Control Number:

10/535,586

Art Unit: 3634

axes of pivoting of the pivot elements at coplanar with eh interior wall of the panel with which they articulate, and in that the pivot elements are connected to the transverse edges of the panels wherein no part of any of the pivot elements project beyond the front and rear walls of the respective panels, wherein the male part of the of the transverse edge has a shaft 62, which defines the axis of pivoting 32, and in that the female part has a drilling 18, to take the shaft, the transverse edge of each of the panels defining a U-sections with parallel flanges 24, 36, connected to the interior and exterior walls of the panel as best seen in Figure 2, wherein the pivot element had a guide device 42, disposed in alignment with portions of the panel between the interior and exterior wall and engageable with the guide rail, wherein the guide device is in connection with the pivot element, in such a way that a rectilinear portion of the respective guide rail is located within the thickness of the panels.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Cuorato (2912533), Katulski (2263995), Siess(2300265) and Greig (2901036) are cited to teach the utility of articulated door panels.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Candace L. Bradford whose telephone number is (571) 272-8967. The examiner can normally be reached on 9am until 5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian Glessner can be reached on (571) 272-8967. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
